FSI DIGITAL - 18-POINT PRE-SUBMISSION AUDIT CHECKLIST

Pre-Submission Verification Checks:

2. Ensure the legal applicant is incorporated in Canada or the target US state (matching federal registry files).
3. Verify that CRA/IRS tax accounts are completely clear of any back-due payroll or source deductions.
4. Align project starting dates: ensure no capital spend or hiring payroll is retroactively claimed before signing.
5. Check stacking parameters: confirm that total provincial/state and federal assistance does not exceed 75%.
6. Verify that contractor quote documents clearly outline technical deliverables, hourly rates, and timeline schedules.
7. Review technological uncertainty framing: verify standard coding routines are not claimed as R&D.
8. Confirm payroll records show matching source deductions (T4 summaries or equivalent W2 registries).
9. Check that financial statements demonstrate at least 3 months of operational runway for matching cash splits.
10. Verify that the company size classification (e.g. CCPC under 500 FTEs) matches the exact program threshold.
